

G1

Here is an Admin Login Screen

A screenshot of a Windows-style application window titled "Decision Line Admin Login". The window has a standard title bar with minimize, maximize, and close buttons. Inside the window, there are two text input fields: "Admin:" with the text "Jill" entered, and "Password(required):" with "****" entered. Below these fields are two buttons: "Submit" and "Cancel".

Moderator and user login. If EventID is left blank, it assumes you are logging in as a moderator who has to create a new event. If an eventID of an existing eventID is entered, and the name is the moderator, the event editing screen is entered. If you are a user, you go to a user oriented screen (add a choice for an open event, or select a choice for a closed event. You are rejected if the eventID is not valid for your name. If you have no further choices, and no decision has been reached, you are informed that you have entered all your choices, and the event is waiting for the choices of others. If the decision has been made, you are informed of the choice.
